LutinX

PROJECT

LutinX, take care of your Ideas and Data.

Our hybrid system merges verified identity (KYC Process), more than 100 Blockchain and AI applications, and **NO** crypto-currencies (AML Compliance).

We are the **first web platform** designed for Public services, Transversal to countries, **jobs**, and **skills**.

Full **kyc** platform

More than **100** blockchain applications

No crypto-currencies

LutinX

PROJECT

LutinX is a digital environment for identified participants.

"If the identity is not certain, any Certification does NOT make sense "

Alessandro Civati, cit. 2018

A unique Platform

With LutinX, schools, Companies, Institutions, and Governments can access trusty to an infinite series of "syndicate" data, not more modifiable, managed in the law respect.

For the world's citizens

Nationality, Skin color, and language are not important. Inside the Booklet®, your skills, diplomas, job roles, sports results, and more can be accessible everywhere, freely and safely.

LutinX

IS FOR

CITIZENS

NO-PROFIT

LutinX

PROJECT

We create alliances to face new market challenges.

LutinX as an international reality - active today in over 50 countries - works to participate in strategic projects at a national level, with market-leading operators, and Business Networks. Our goal is to **team up to beat the competition (ours and yours)**.

The Value of Loyalty

Since 2021, the year in which we began operating in the United States, we have gone off the rails of doing business in the Italian style and have approached a business model in which the Partner is our most important ally and treasure. *Together, we reduce costs and R&D investments, we share experience and opportunities, and we defeat the competition, which alone does not have the strength, the resources, and above all the time to oppose our joint proposals.*

Trust solved by technology

LutinX integrates an advanced “Referral” system that, based on our KYC Compliance environment and our Blockchain technology, guarantees certainty and independence in recognizing commissions and supply chains. In LutinX, if a customer alone spends, the person who brought him earns in real-time - transparently and automatically, and above all, legally traced.

your

PARTNER

OUR GROWTH

07.2017 - **The Idea**

Development of the project idea and establishment of the development group.

09.2018 - **We are LIVE**

We finish the tests and we are live on the Blockchain network.

11.2018 - **International Civil Protection**

International partnership development at the United Nations, with the ICDO.

05.2019 - **LrxCULTURE**

Presentation in the Chamber of Deputies and the Senate of the Republic of Italy.

01.2020 - **EthicLRX**

The Ethic and Referral Payment infrastructure is live for citizenship support.

02.2021 - **TAKAMAKA**

Transition to the first public Blockchain written in JAVA, and FINMA (Switzerland Financial Authority) compliant.

05.2021 - **L.HEALTH**

Blockchain for Health is a reality. A complete suite of products to store/track/share medical data, including second opinion reports.

10.2021 - **L.SKILLS + INAPP**

INAPP (Italian Gov.) Skills Almanac integrations, including DigjCompEdu references from the European Union.

03.2022 - L.TRACE

Supply chain traceability system for more than ten industries, like agriculture, healthcare, logistics, and aerospace.

07.2022 - L.SOCIAL

Multiple solutions for Marketers and Social Networks that use Blockchain Power.

12.2022 - CCMC

Blockchain Project designed to trade voluntary carbon credits, including their history and supply chain without intermediaries.

03.2023 - BBADGES.org

The unique worldwide alternative to the US openbadges. BBadges supports Students and Employees in managing Skills and Talents. Moreover, user data are distributed between Switzerland, Ireland, West Africa, and the Middle East.

11.2023 - COPYRIGHT.ZONE

The Global Blockchain System for Intellectual Property and Authorship Certificates. It is a free (for B2C) platform with data tracking and certified sharing functionalities legally compliant with the Bern Convention. The system includes a legal data conservatory interface for Police and Justice verification.

08.2024 - WHITE LABEL

The LutinX world in your world. All our apps with your logo, email communications directly with your identity, and all our R&D become applicable to your ecosystem, without your users knowing about us.

01.2025 - ESG BLOCKCHAIN

Una Suite che unisce Blockchain & AI per il mondo ESG, in particolare per la (S) e la (G). Offriamo gli strumenti per valorizzare il Bilancio Sociale, e ridurre in modo drastico i rischi legali e penali dei Manager, nella gestione esterna all'azienda.

THE SOLUTIONS

L.iD® - Multi Pass

Identity Verification with API system for a trust multi-platform login system.

1

L.STAMP®

Notarization & Certified Sharing application that merges KYC, timestamp, and unmodifiable content.

2

L.CARD®

Job title, Delegate, and Signature Power in a new smart application.

3

THE BOOKLET®

A Live Archive for Everyday Life Experiences (Education, Training, Health, Sport and more)

4

L.TRACE®

Supply Chain Traceability System from Industries

5

BBADGES®

Digital Credentials and Skills Traceability without limits worldwide

6

COPYRIGHT.ZONE®

Intellectual Property and Copyright registration - Valid in 175+ Countries

7

ESG BLOCKCHAIN®

Sustainability and Corporate Governance are finally traceable and measurable.

8

THE

SOLUTION

- [LutinX](#) is a platform of Blockchain and AI services, fully functional.
- Technologically safe, not replicable, unlimited expandability thanks to the hybrid environment.
- Interconnected with different systems thanks to the increasing APIs released by [LutinX](#).
- Identity of Individuals, Companies, and Institutions verified upstream.
- Compliant with KYC and A.M.L. laws and regulations (UE, CHE, USA, CN and RU).
- Traceability of the links between private companies and the public integrated into the system.
- Ability to manage certifications, training, health, and much more upstream.
- The issue, with LEGAL validity, of Certificates, Diplomas, and Declarations.
- Always usable both for face-to-face or virtual activities, such as Boards of Directors, Presidency Sessions, Court hearings, medical consultations, or notorious activities.
- Immediate and objective verification of the Data.
- Cloud and Disaster Recovery system, integrated by multiple levels of data encryption.
- Concrete solutions for the Acceding States' international development - Such as a System of validation of qualifications and a centralized registry for the State customs service.
- Central management of assets on real and intellectual property.
- Concrete solutions for Public Administration and support to the world of Health and Safety.
- Internal ethical system for citizens support, promote locally under single authority agreements.
- Fast, Effective, and USABLE by anyone.

THE

SOLIDITY

- Tamper-proof and collusion-proof ledger immutability.
- Scalable levels of cryptography are applied natively to different services.
- Full traceability: Possibility of control, tracking, and tokenization.
- No human errors - The platform is based on automatic execution functions, eliminating human errors, such as the risks of fraud or evasion.
- Personal 'declarations' are unique, registered, and associated with 'real' subjects identified thanks to the KYC registration procedure.
- It is NOT possible to access the LUTINX functions anonymously.
- The certification system offers results with univocal probative value.
- The validity of the certificates and/or attestations is proven by our Authority & Tracking service. The legal value is given by the Subject issuing the Certificate, not by [LutinX](#), while the technology itself provides the legal date.
- Scalable system for the management of user groups, to further enhance the value of institutions and citizens.
- Integrated and multi-platform system for local payments, treasury payments, or the application of taxes on the movement generated, both within the country and from abroad.
- Internet Connection & Storage developed on US, European, and Switzerland servers.
- Adaptable and Hybrid technology, designed for future scalability.

GDPR, PRIVACY

For [LutinX](#), the data of its users is the priority. Our privacy statement has been designed to help the User in his experience within our platform. Also, the offer of our various services may vary depending on the geographical area. The Privacy Statement may be integrated with other communications based on the affected Sites and services.

Concerning the European Union, our users' identity documents are deposited in IRELAND. [LutinX](#) does NOT carry out commercial activities of any kind on the identities of its users or about their activities.

Based on our International presence we can activate Country Based Server infrastructure to guarantee Local government requirements. [LutinX](#) supports Institutions to bring innovation to their citizens, with specific Project financing projects.

Security, Trust, and Transparency
are the three main key
for [LutinX.com](#)

SYSTEM

SECURITY

ADVANCED SOLUTIONS FOR ACCOUNT DATA PROTECTION

TWO-FACTOR AUTHENTICATION

Ability to immediately activate Google and MS two-factor authentication (with separate APP on the mobile phone) or notification on registered email.

ACTIVE PIN

Once the account has been verified, it is mandatory to set your numeric PIN. It will be required to sign or share documents and/or information or access the partner program's revenues.

BIOMETRIC DETECTION

For our Mobile solutions, it is possible to activate Face-ID and fingerprint access control if your devices are ready.

DATA ENCRYPTION

We offer SHA512-bit encryption with a legal repository directly inside the Blockchain hashes for total proof of authenticity.

CLOUD & PHYSICAL BACKUPS

All our network is in redundancy mode. Moreover, we guarantee disaster recovery backups for all our Public Services directly on our servers.
